

# Take Your **Clinical Performance** to the Next Level

AUDITDATA  
MEASURE

# Unleashing the Future of Audiology:

Experience the Power of Wired and Wireless Connectivity Run by Advanced Measurement Software & Fitting Unit

**Auditdata Measure** is the ultimate suite of solutions for hearing care providers seeking to improve their first fit process, increase hearing aid usage, and personalize fittings. Our suite of audiological equipment is run by advanced software that lets you manage and optimize your clinical workflows based on data-driven insights. Standardizing, benchmarking, and optimizing your clinical processes means higher clinical performance, better quality, and ultimately, providing the best care experience to individuals with hearing impairment.

# Introducing Our **Diagnostic Audiometer & Fitting Unit**

## **Stackable Design:**

Our new audiometer is stackable and sits perfectly on top or below the loudspeaker, optimizing your clinic's layout.

## **Wireless Capabilities:**

With our groundbreaking audiometer and fitting unit solution, you can choose between a wired or wireless setup.

## **Portable:**

Our audiometer effortlessly slips into a standard laptop-bag, enabling seamless mobility with USB-powered functionality.

# Identify Hearing Loss, Precisely Fit Hearing Aids with Integrated Suite of Solutions

## Hearing Assessments

If you are searching for a solution that provides comprehensive and accurate evaluations of patients' hearing capabilities, try our hearing assessment suite. Seamlessly administer a wide range of audiological tests, from Pure Tone Audiometry to Bone conduction, Otoscopy, and Tympanometry, with cutting-edge technology.

## Hearing Instrument Fitting

If precision in instrument fitting and thorough testing is what you seek, our integrated solution is designed for you. From Real Ear Measurement (REM) to Speech Mapping, RECD, and including specialized tests for hearing instruments testing, we have you covered.

## Clinical and Fleet Reporting

If you are eager to tap into powerful analytics and performance metrics, our clinical and fleet reporting tools offer in-depth insights into your practice's health. Track key performance indicators, measure outcomes, and identify areas for improvement.

## Service for Clinic Operations

If you aim to maximize your clinic's operational efficiency with minimal downtime, our transducer swap service and comprehensive training programs are perfect solutions for you. Enjoy uninterrupted operations and receive tailored support from our team of experts.

# Software Designed to Empower Audiologists

## Provide Consistent Quality with Clinical Workflows

Streamline daily clinical processes with Measure Software, enabling consistent, high-quality customer service. Clinical workflows make it possible to create and customize working methods to suit individual clinic needs.

## Notification Alerts to Drive Positive Decisions During Testing

Track and deliver exceptional care with confidence, supported by visual notifications and reminders in Measure Software. Audiologists are encouraged to take immediate action, resulting in a solid starting point for effective hearing interventions.

## Effortless Customization and Seamless Distribution

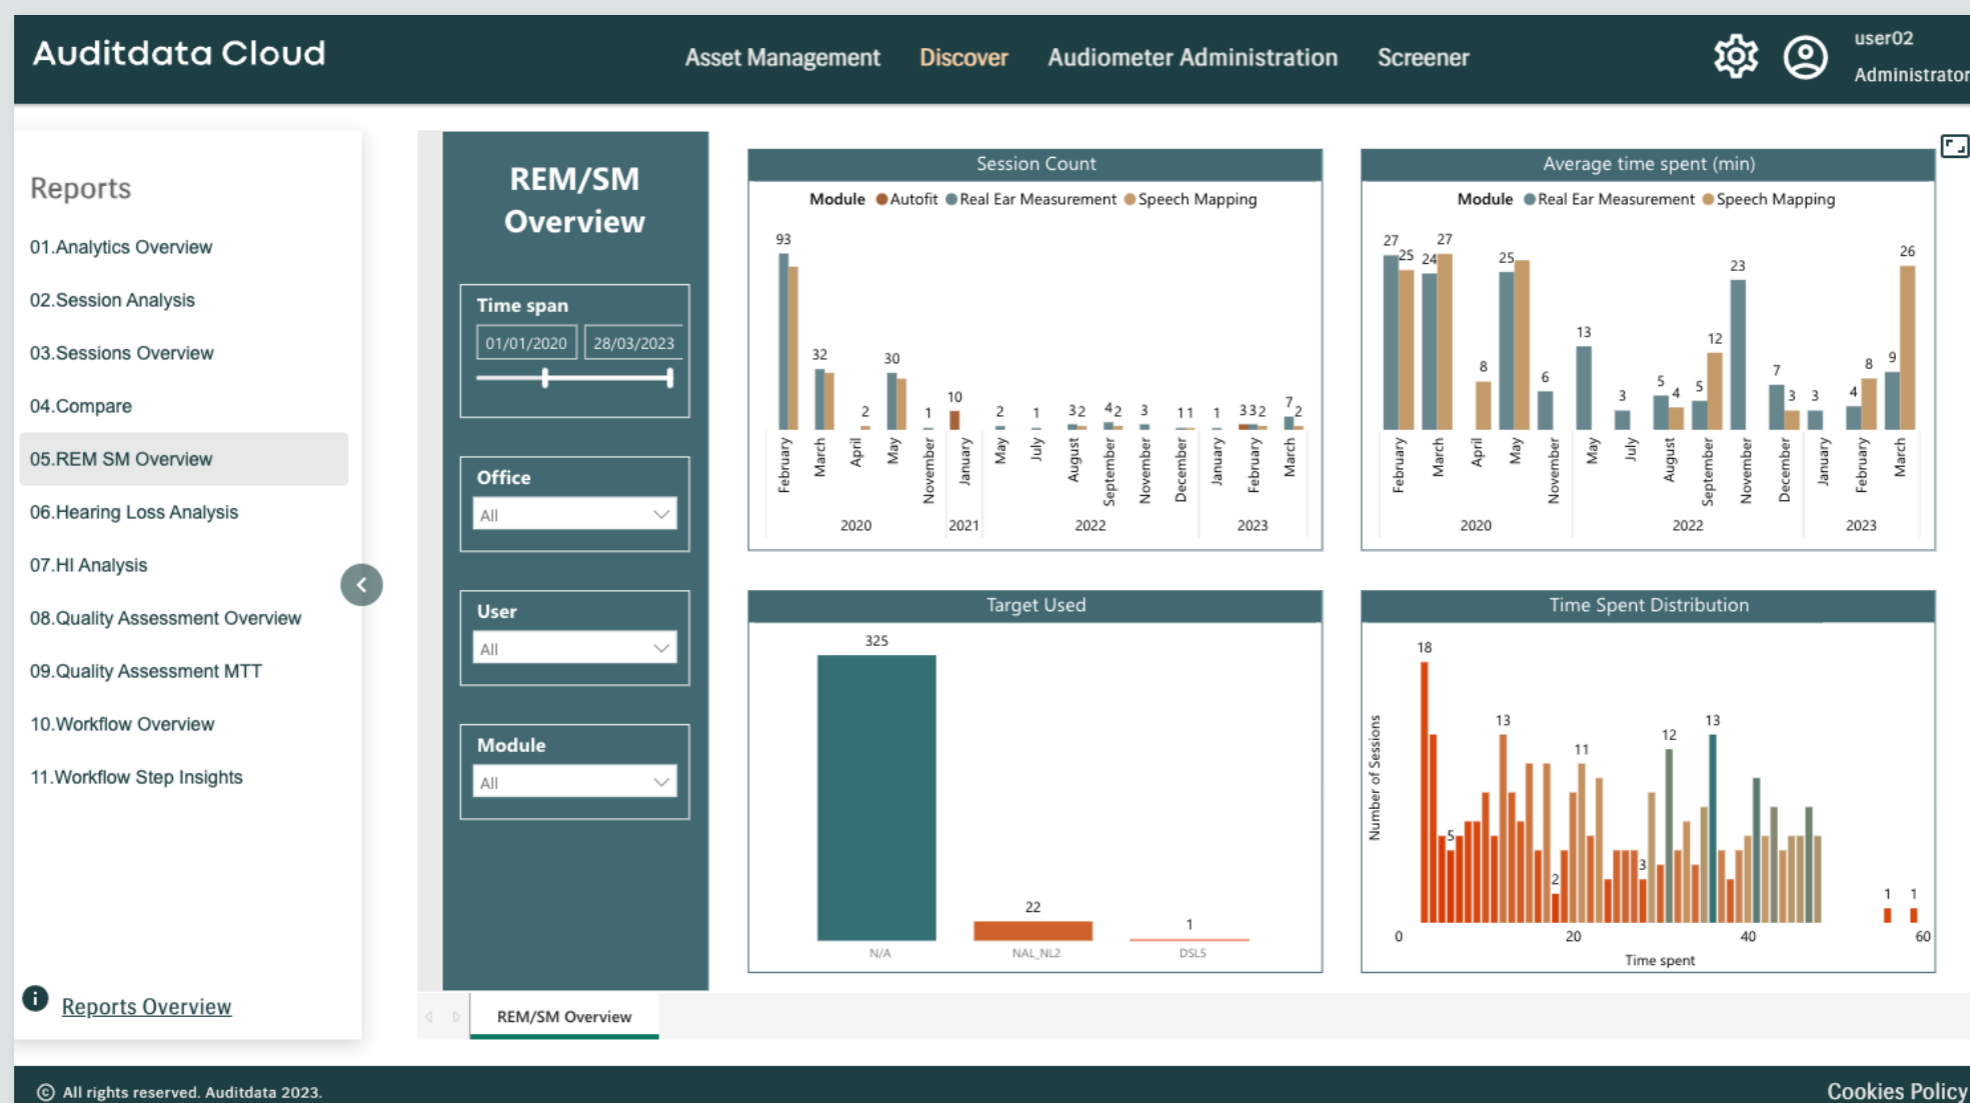

Share files containing settings, test definitions, and workflows seamlessly across multiple testing and fitting units, eliminating manual configurations. Tailor the software to achieve centralized distribution, ensuring consistency and efficiency in all clinics.

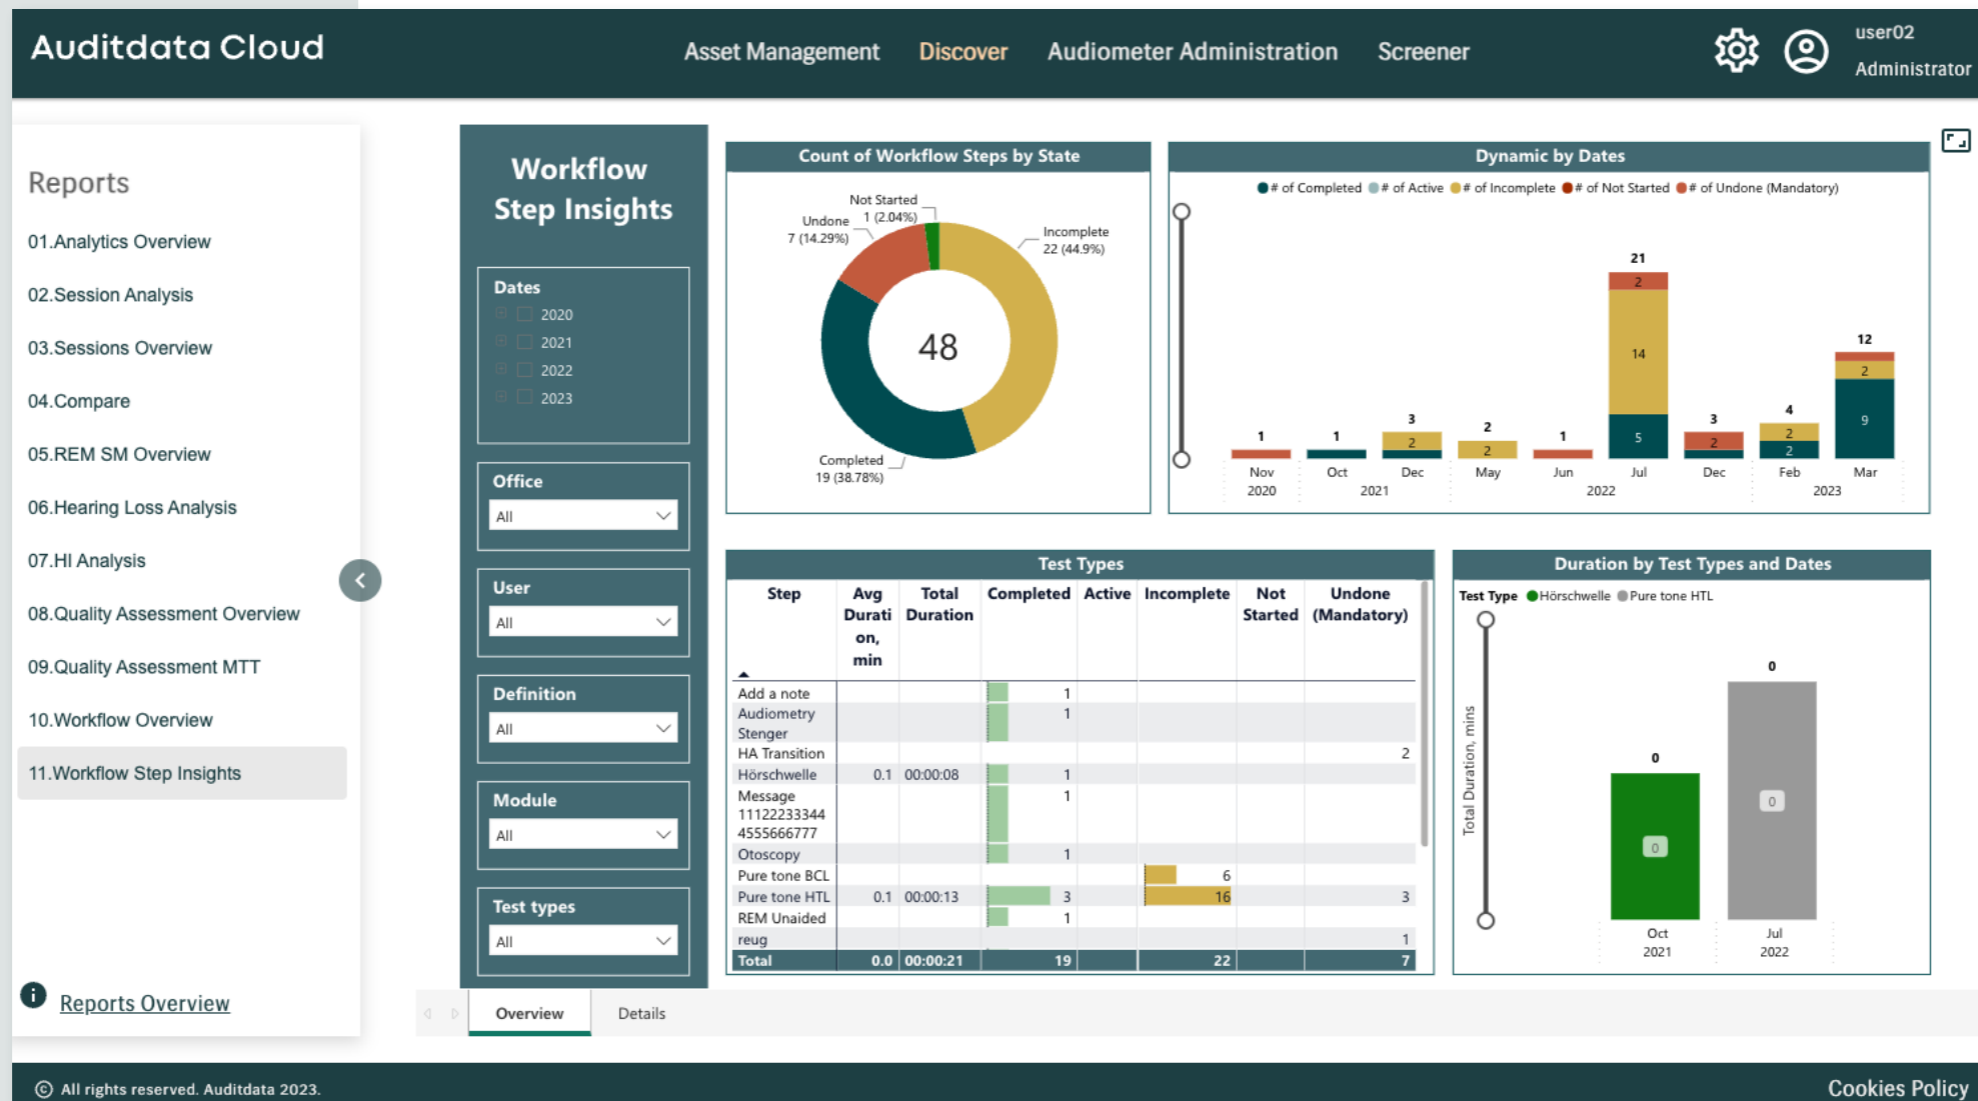

# Unlocking Clinical Insights for Enhanced Care Experience

We understand the importance of delivering the best care experience to your patients. That is why we have developed powerful clinical reporting tools that provide invaluable insights to improve patient outcomes and streamline your workflow. With our comprehensive suite of clinical reporting features, you can harness the power of data to optimize your customer journey and drive better results.

# **Transform** Your Audiology Practice **Today!**

We work hand-in-hand with customers to transform the way you manage and deliver services to people with hearing loss. With data-driven solutions catering to all touch-points of your customer journey, we help you take a proactive approach to achieving excellence in how you deliver patient care and run your audiology business.
